

Protection Film Cleaner

Prime Element Protection Film Sealant is designed to strengthen and protect all polyurethane paint protection films from common environment pollutants. This durable coating forms a protective barrier which protects the film against acid rain, tree sap and bird droppings, while preventing discoloration due to exposure to diesel smoke, pollen and other environmental pollutants.

Directions:

1. Vehicle and Paint Protection Film should be clean and dry.
2. Shake Well
3. Apply to one section at a time using a foam or cotton applicator.
4. Allow to haze and remove with a microfiber cloth.
5. Remove any excess from edge of film using a detail brush or damp microfiber cloth.

Caution:

Do not take internally. Contains aliphatic hydrocarbons. Do not induce vomiting. Consult a physician. Keep out of reach of children. Consult MSDS for additional information
